Short Description

Bitspower CPU Block Summit MS Mounting Kit for AM5

Description

Bitspower CPU Block Summit MS Mounting Kit for AM5

The new AMD AM5 platform providing native support for up to 170 w; This means that your computer has a high temperature. For this problem, Bitspower products are still effective at cooling the computer system.

Features

AMD has ensured that existing AM4 cooling solutions will continue to be supported, which means transferring to AM5's seamless transition budget focused customers. Bitspower AMD water block can be directly migrate to socket AM5 motherboards.

Bitspower present you with a set of AM5 kit for Summit M/MS.

AM5 kit for Summit M/MS is a set of screws. These screws are integrated into the water block and are screwed into the stock backplate of the motherboard.

Bitspower AM5 kit for Summit M/MS kit can convert Bitspower Summit M/M CPU water block into an AM5 compatible product. Bitspower's Summit M/MS water blocks are optimized to achieve cooling, In this way, you can upgrade to AM5 and enjoy AM5 without purchasing a new CPU block.
