Alphacool Core Distro Plate 240 Right VPP/D5

$157.95

Product Images

Short Description

Alphacool's Core Distro Plate is a must-have for any performance-oriented custom water cooling system, as it greatly simplifies the planning, setup as well as maintenance of complex water loops.

Description

Product Information

Alphacool's Core Distro Plate is a must-have for any performance-oriented custom water cooling system, as it greatly simplifies the planning, setup as well as maintenance of complex water loops.

Features

Core Design
A core element of Alphacool's Core Design series are the chrome-plated, brass G1/4" connectors. With the Core Distro Plate, the ports are recessed instead of screwed into a thread as is usually the case. This allows Alphacool to overcome the problem of potential leakage due to cracking by screwing the connectors directly into the acrylic. The connectors are made of two parts, have an O-ring and counter each other when mounted in the acrylic. This not only ensures absolute leak proofing of each connector, but also allows for the clean and functional look of Alphacool's Core Design series.

Easy installation
Using the included Core Push Mounting kit, the Distro Plate can be mounted on the case panel or on a radiator. To do this, the metal pins are attached to the radiator or the panel of the PC case and the matching female sockets are attached to the Distro Plate (see manual). The next assembly step is to simply push the Distro Plate onto the pins without the need for any tools. Alphacool's push-mounting allows for a tight fit of the Distro Plate on the case panel or radiator and allows for easy removal for maintenance or expansion projects.

Gamechanger
It has an integrated reservoir as well as a pump top for VPP or D5 pumps and is offered as a 240mm or 360mm variant, each with left or right positioning of the pump top. This makes the Core Distro Plate ideal for custom water loops where CPU and graphics card(s) are to be cooled simultaneously. Due to the arrangement of the G1/4" connections, complicated tubing paths will be a thing of the past in the future. There is an additional drain port on the side, with which the Distro Plate can be drained easily and comfortably.

High-quality material selection & brilliant illumination
Alphacool's Core Distro Plate is made of high-quality acrylic. This allows an unobstructed view of the coolant and enables brilliant illumination from the built-in digitally addressable aRGB LEDs. The lighting can be controlled via a digital aRGB header on the mainboard or optionally by Alphacool's Aurora Eiscontrol aRGB controller (item no.: 15360).

Compatibility:

- Can be mounted on the radiator or panel

Specifications

Technical data Distro Plate	
Dimensions (L x W x H)	240 x 125 x 68,80mm
Material	Acrylic
Volume	164ml
Pump compatibility	VPP/D5
Threads	8x G1/4" inner thread / 1x drain port
Maximum working temperature	60 °C
Pressure tested	0,8 Bar
Quantity digital aRGB LEDs	12
Power digital aRGB LEDs	5V
Power connection digital aRGB LEDs	3-Pin JST + 3-Pin 5V
Weight	1260g
Color	transparent
Technical details	
Manufacturer:	Alphacool
Color:	Transparent
Preinstalled pump:	No
Connector:	G1/4" inner thread
Fillport:	G1/4" inner thread
LED hole:	Not available
Model of reservoir:	Distro Plate
Number of connections:	8

Material:	Acryl
Pump compatibility:	für 1x D5/VPP
Volume:	164ml
Dimensions:	240 x 125 x 68,80mm

Additional Information

Brand	Alphacool
SKU	AC-15474
Weight	2.0000
Color	Black
Reservoir Type	Distribution plate
Pump Type	VPP/D5
Vendor SKU/EAN	4250197154741
