

fg Flexegraph Go Chiller Astro D-Series Pre-Mix - 1 Liter - UV Pink

\$23.49

Product Images

Short Description

Designed to look great in under normal and UV lights, Go Chiller Astro UV-Series is a pre-mixed, water-based computer coolant which uses a premium inhibitor formulation to protect computer cooling systems such as radiators, pumps, and water blocks, and ensures efficient thermal performance.

The inhibitor formulation meets ASTM D1384 corrosion standards preventing foam, rust, corrosion, cavitation, scaling, oxidation and degradation of the cooling system. It is also not harmful to rubber seals or hoses.

Astro UV-Series provides outstanding performance and low environmental impact. A long lasting coolant with exceptional colour stability, Astro UV-Series is available in 3 UV-reactive colours to match your ideal build aesthetic.

Bottle: 1 Liter

Features

How often do I need to replace Astro?

- We recommend replacing your Go Chiller Astro coolant every 2 years to ensure the smooth running of your cooling system.

Is Astro compatible with metals?

- Yes, all Go Chiller products are compatible with a range of metals such as copper, nickel and aluminium, with a specially designed additive package to protect against corrosion.

Is Astro UV-Series ready to use?

- Yes, Go Chiller Astro coolants are pre-mixed and ready to use.

Specifications

Specifications:

- Bottle Qty: 1 Liters
- Color: UV Pink

Is Astro D-Series ready to use?

Yes, Go Chiller Astro coolants are pre-mixed and ready to use.

Instructions for use

- 1. Turn off and unplug your computer
- 2. Drain existing coolant and chemically flush
- 3. Fill your loop with Astro and experience the coolness!

For maximum performance, flush your system of any previous coolant with deionised water before adding Go Chiller coolants (check out our [Go Chiller Deionised Water!](#)). We recommend using our [Prep-Cool](#) flush for a thorough clean.

Additional Information

Brand	Flexegraph
SKU	GC-ASTRO-D-UP-1L
Weight	2.2000
Color	UV Pink
Fluid Type	Pre-Mixed Fluids
Volume	1 liter
