Short Description

Looking for a perfect surface for both gaming AND building your custom water-cooling loops? Look no further, as EK® has you covered with its brand-new accessory item, the EK-Loot Mousepad - Quantum.

Description

Details

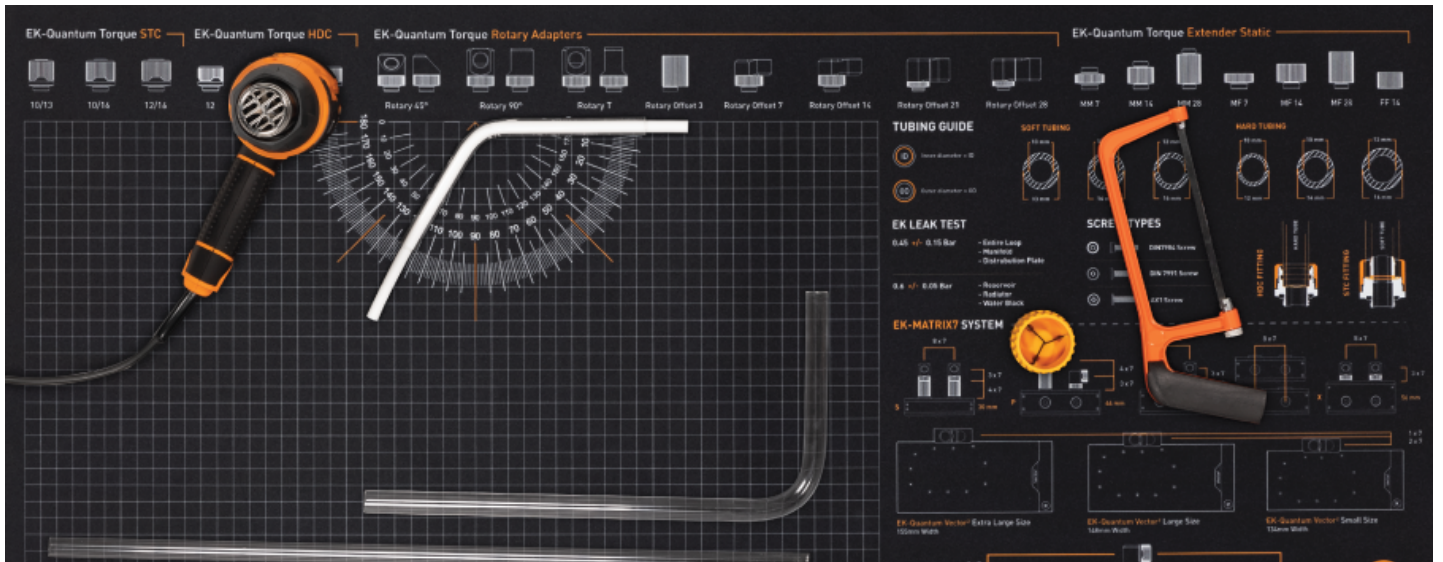

Looking for a perfect surface for both gaming AND building your custom water-cooling loops? Look no further, as EK® has you covered with its brand-new accessory item, the EK-Loot Mousepad - Quantum. These mats have numerous useful features to make your loop-building process easier, your PC environment more awesome, and your gaming sessions more successful. Aside from being a perfectly smooth surface for your mouse to slide across, these EK-Loot mousepads will also be a great reminder of the fun times you had building the loop, bending the tubes, and thoroughly enjoying your new hardware.

Features

EK-Loot Mousepad - Quantum Dimensions L

This mousepad is inspired by the Quantum line of EK products and features various useful sketches and information that can help you with your loop-building process, including an explanation of the EK-Matrix7 system. It features guides for tubing, EK-Quantum Torque fittings and extenders, screw types, and more; while it also eliminates the need for remembering the exact pressures needed for loop testing - it's right in front of you on the mat.

Sized 900mm by 400mm, the L size is the all-rounder. It offers a large surface area to fit a mouse and a keyboard or build your water-cooling loop on while remaining compact enough to fit on smaller desks.

The low-friction fabric surface also has exceptional tracking performance for optical and laser mice. The mat is 3mm thick with a non-slip rubber base that keeps it in place even during the most intense gaming sessions or loop assembly.

The edge of the mat is decorated with dense anti-fray stitching that increases durability and prevents

everyday wear and tear that mousepads must endure. The stitching is vulnerable to fire and cat claws.

Specifications

Technical Information:

- Size: 900 x 400 mm
- Thickness: 3mm
- Color: Black
- Materials: Rubber, fabric

Designed in EU - Slovenia
Made in China
