Short Description

EK-Loop Metal Tube 12mm 0.5m - Black (2pcs) is a pack of two 0.5-meter-long metal tubes with an outer diameter (OD) of 12mm.

Description

Details

EK-Loop Metal Tube 12mm 0.5m - Black(2pcs) is a pack of two 0.5-meter-long metal tubes with an outer diameter (OD) of 12mm. These brass tubes are perfect for builds utilizing straight runs from the components to an EK-Quantum Reflection distribution plate.

Features

The metal tube can be cut to size using a [tube-cutting tool](#) and installed straight, or bent to an angle using a pipe-bending tool. Bending metal tubes is not easy, so EK offers the pre-bent option with a 90-degree bend.

These brass tubes are only compatible with hard tubing fittings. EK recommends EK-Quantum Torque HDC series fittings. These tubes come in packs of two tubes 500mm long.

Made of brass treated with black plating.

Specifications

Technical Specification:

- Material: brass
- Finish: Black
- Diameter: 12mm
- Length: 500mm
- Compatible fittings: EK-Quantum Torque HDC 12
