Short Description

The Lian Li Strimer Plus RGB 12VHPWR 12+4-Pin Cable V2 (162 LEDs) is a 320mm extension cable that provides vibrant and smooth RGB lighting.

Description

The Lian Li Strimer Plus RGB 12VHPWR 12+4-Pin Cable V2 (162 LEDs) is a 320mm extension cable that provides vibrant and smooth RGB lighting. It features a premium silicone (TPE) cable, a new side light strip,

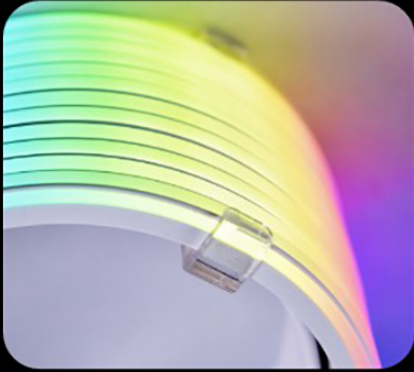

162 LEDs for a consistent glow, and is easy to install.

Features

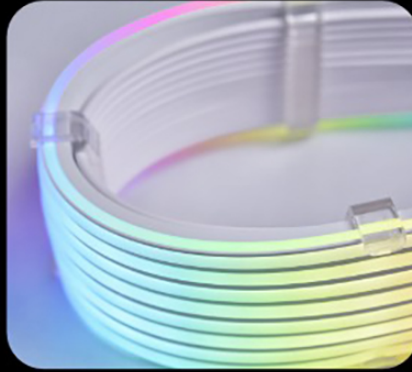

THREE TYPES OF 12VHPWR ARGB EXTENSION CABLES

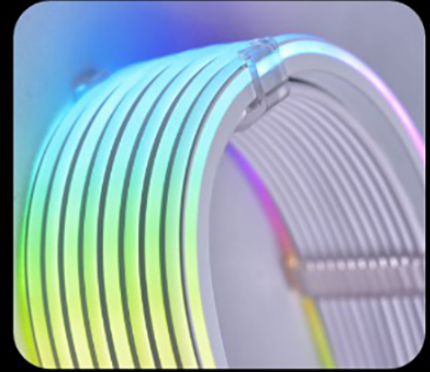

Adapting to the new GPU connector, STRIMER PLUS V2 12VHPWR is now available to add the RGB touch to the latest GPU models.

12+4-PIN to 12+4-PIN
12 light guides
For 12VHPWR GPU connector

12+4-PIN to 12+4-PIN
8 light guides
For 12VHPWR GPU connector

3X8 PIN to 12+4-PIN
8 light guides
For 12VHPWR GPU connector
SUPPORTS UP TO:
450 W, if power supply PCIe cable is 18 Awg.
600 W, if power supply PCIe cable is 16 Awg.

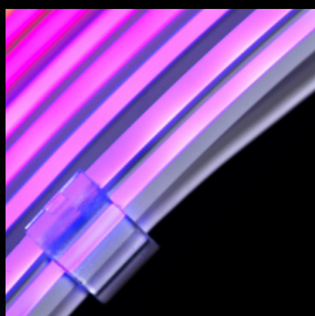

LAST PIECE OF RGB SET-UP YOU NEED

Upgrade the RGB in your PC with ARGB extension cables.

Next Level of Brightness

Introducing a new side light strip, brightening STRIMER PLUS V2 in different ways.

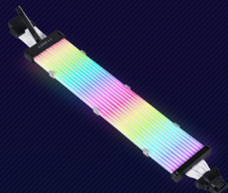

STRIMER PLUS V2

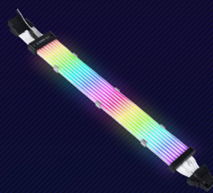

STRIMER PLUS V1

Numerous LEDs

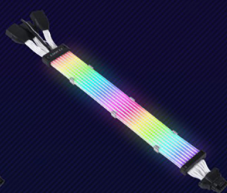

Allocating many LEDs evenly to glow your build with complex lighting effects.

12+4-PIN to 12+4-PIN
12 light guides
162 LEDs

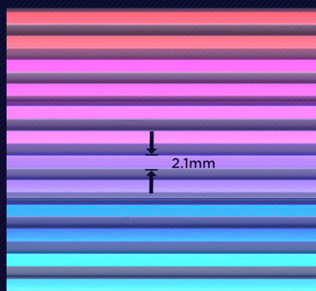

12+4-PIN to 12+4-PIN
8 light guides
108 LEDs

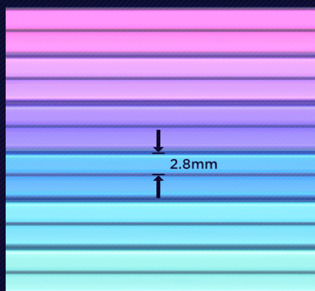

3X8 PIN to 12+4-PIN
8 light guides
108 LEDs

Smooth Lighting Style

Illuminate the STRIMER PLUS V2 with a sleek design by reducing the lighting strips' width to 2.1mm.

STRIMER PLUS V2

STRIMER PLUS V1

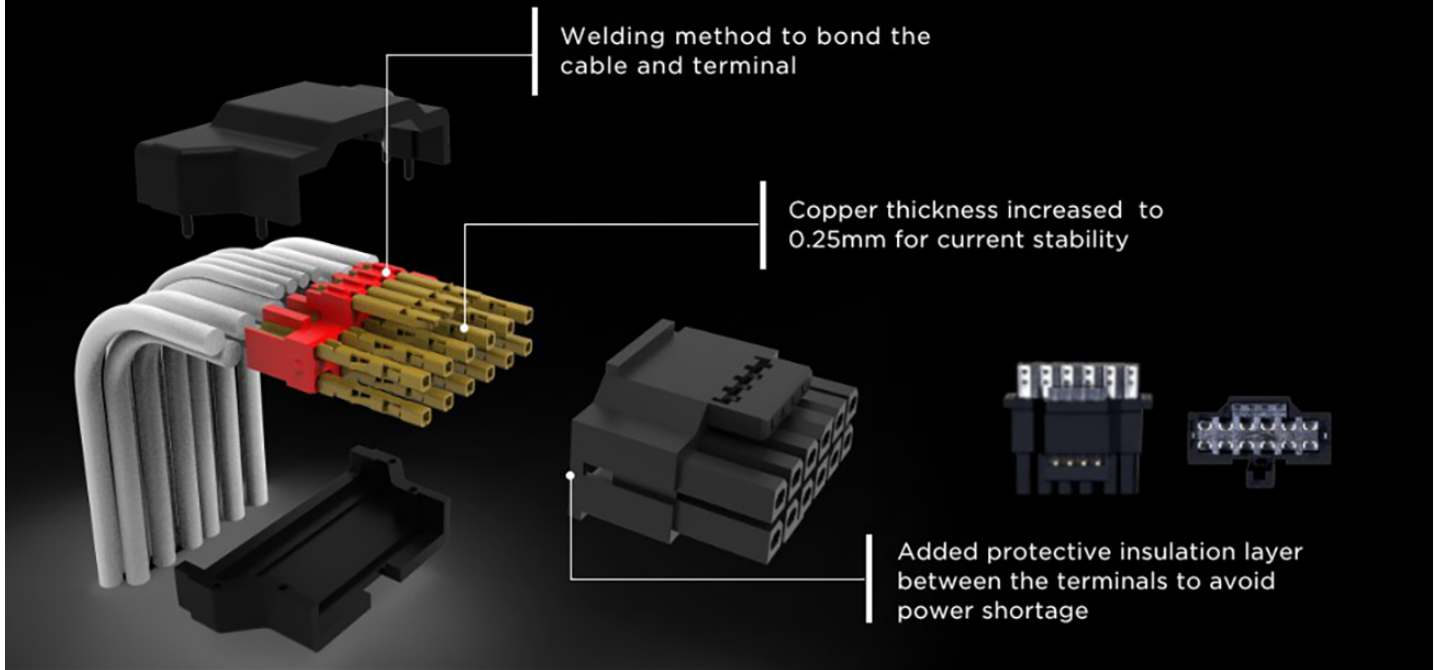

HIGH QUALITY DESIGN

A well-engineered product that glows with quality.

12VHPWR CONNECTOR RE-IMAGINED

To avoid overheating, this 12VHPWR connector features a custom design.

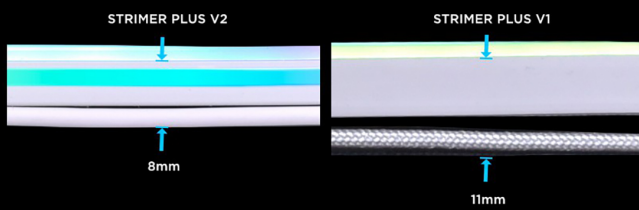

STRAIGHTFORWARD INSTALLATION

Install STRIMER PLUS V2 12VHPWR with perfect curvature and sparkle your build with RGB.

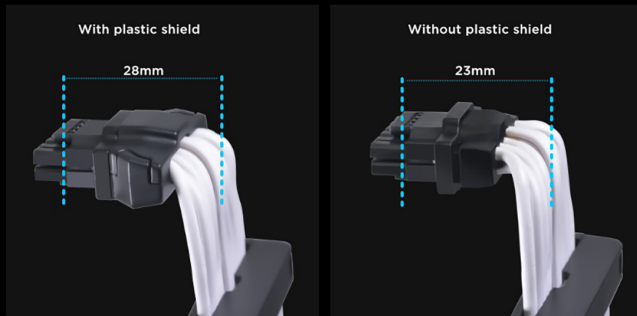

Slim and Flexible

The thickness of the RGB zone and the cable on the V2 are reduced to 8mm, ensuring flexibility for all kinds of configuration.

Flexible Clearance

A minimum of 28mm of clearance is required when installing the 12VHPWR connector. For situations where less clearance is available, the plastic shield can be removed to reduce the required clearance to 23mm.

Match the Color of your Build

Includes extra white clips to match the hardware color inside your PC.

ARGB SYNCHRONIZATION WITH THE MOTHERBOARD

The cable has a 3 PIN 5V ARGB adaptor to connect to the motherboard directly.

Note: Lower 50% of the brightness when applying static white.

(Check detailed instructions from manual)

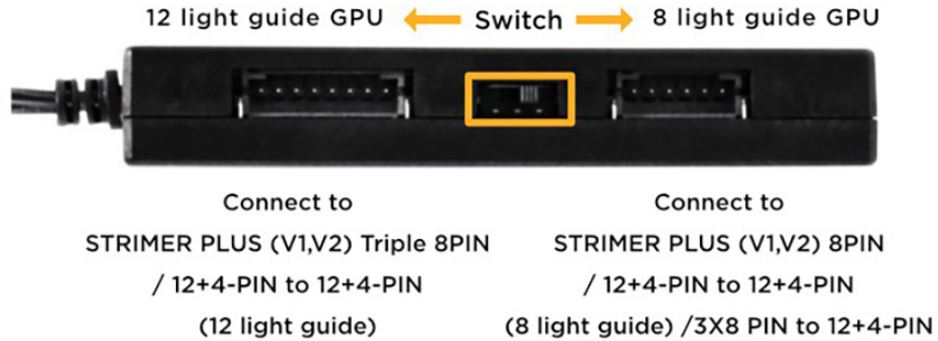

MYSTIC LIGHT

ADDITIONAL ACCESSORY STRIMER L-CONNECT 3 CONTROLLER

The controller that is included in STRIMER PLUS V2 24-PIN (or available separately) offers full control of L-Connect 3.

1 Connect to PSU SATA Cable

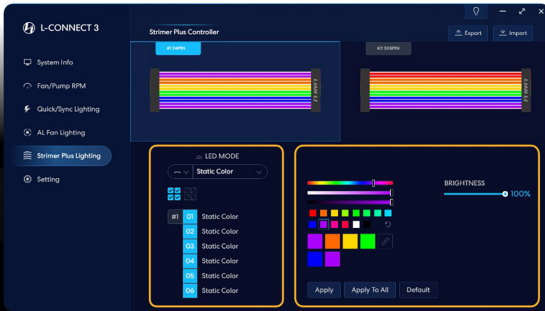

Note: If using the static white lighting effect frequently, please connect to the SATA header as close to the PSU as possible and do not connect other ARGB device (eg. UNI HUB) to the same sata cable.

2 Connect to MB 5V ARGB header

3 Connect to MB USB 2.0 header

USE L-CONNECT 3 SOFTWARE TO CONTROL STRIMER PLUS V2

Gain full control and preview the lighting effects of the STRIMER PLUS V2 with the L-Connect 3 interface.
Download L-Connect 3: <https://www.lian-li.com/L-connect3>

Select combination / Individual lighting effects

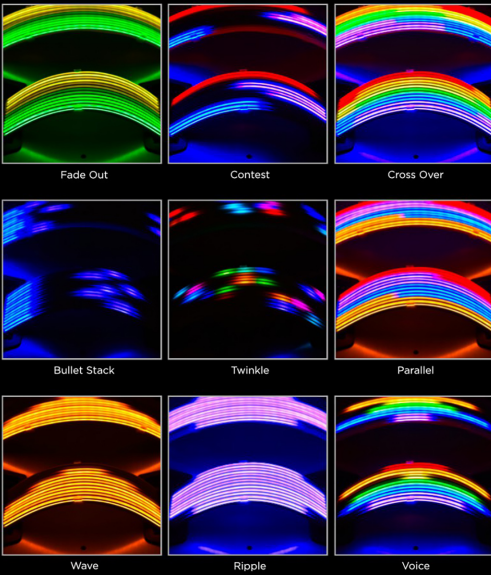

Set personalized color / brightness / speed / direction

UNLOCK YOUR IMAGINATION OF LIGHTING EFFECTS

Without the need of opening the case, STRIMER PLUS can now be controlled via the L-Connect 3 software with 11 individual modes and 13 combined lighting modes. The highly customizable software brings the option of setting different sophisticated lighting effects on each STRIMER PLUS or even on each channel (2 light strips).

Combined Lighting Effects

Display your PC with the new combining lighting effects.

Individual Channel Lighting Effects

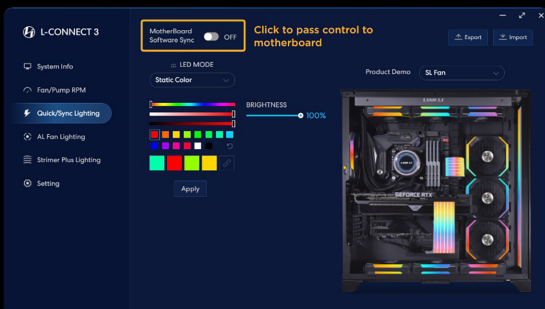

Each 2 light guides is a channel of LED that the L-Connect 3 can control to set personalized lighting effects.

- Tide
- Static Color
- Mixing
- Breathing
- Runway
- Rainbow

Quick Sync with UNI FANS

The quick sync function efficiently syncs all LIAN LI devices' lighting effects in one click. Moreover, you can sync all devices to the motherboard.

PACKAGE CONTENT
