Short Description

Acrylic Panel is a useful material for all modders - mod your own side panel, create an acrylic front for your casing, a bay front cover, watercooling tank, drive cage, PSU cover, fan guard, the possibilities are limitless. TIP: mount lighting (CCFL or LEDs) by the side of the Acrylic Panel - cool lighting effect is amazing.

Description

PPCS 1/4" (5mm) UV Blue. A typical use for 5mm is side windows, but let us not deter your imagination.

UVBlue glows an cool electric blue - fantastic as a highlight. Panel is clear but glows Blue under UV light

Acrylic Panel is a useful material for all modders - mod your own side panel, create an acrylic front for your casing, a bay front cover, watercooling tank, drive cage, PSU cover, fan guard, the possibilities are limitless. TIP: mount lighting (CCFL or LEDs) by the side of the Acrylic Panel - cool lighting effect is amazing.

Easy to cut, durable and non-breakable.

Acrylic Panel is one of the many "mod supplies" products that PPCS introduces with the aim of making modding material more easily available. We hope to to be surprised by your creations.

PPCS says: "Mod supplies lets you mod the mod you want, the way you want it."
