Short Description

If you are looking for a powerful and high-performance but concurrently noiseless case fan, you will find a so far uncommon, however well thought-out solution in the Silent Eagle models. In comparison with conventional fans the unique surface structure of the Silent Eagle allows an improved airflow - at the same rotation speed. This principle is based on the surface texture of a golf ball, which helps to reduce air resistance and turbulence, resulting in particularly quiet operation while maximizing airflow volume. In addition, the rounded edges of the Silent Eagle's frame offer a markedly improved air intake.

Fan cable is 100% wrapped in nylon Techflex sleeving and premium heatshrink, colors of your choice.
