Short Description

USB 3.2 Gen 1 Motherboard Header 19 Pin Internal USB Hub Controller

Description

USB 3.2 Gen 1 Motherboard Header 19 Pin Internal USB Hub Controller

This Internal USB 3.2 Hub (compatible with USB 3.0 and USB 3.1) is the perfect remedy for a computer system lacking internal USB header/port space. This hub adds two USB ports (Internal 19-Pin Header or USB 3.2 Front Panel Header) to the computer by connecting to a USB header on the motherboard or to USB Type-A, and receives its power through the SATA power converter. Use this hub to add lighting, cooling or other systems that require additional USB space.

This USB Header Internal Hub is designed to make life easier. It's all black thin body with premium adhesive backing enables its user to conveniently place it anywhere near the motherboard with great looking!

Speed is of no concern as this USB 3.2 Internal Hub utilizes transfer speeds of up to 5Gbps, avoiding the sacrifice of time or connectivity.
