

Singularity Computers Plasma CPU Water-block - PPCS Custom Editions!

\$139.00

Product Images

Short Description

Singularity Computers has created a CPU water-block which is compatible with both Intel Socket 1700 and AMD Socket AM5!

Not feeling that clear block look? Now, enter PPCS's creativity, we would like to offer our customers more colors for the block and the hardware screws. At PPCS we can professionally Cerakote your block in any color almost and give you a choice of 7 anodized screw colors. With these choices, you can make this block look custom to your system in amazing looking colors! Check below to build this block exactly how you wish it to look and don't worry we left the sides of the block clear so that your RGB lighting can still be seen. It's a very cool look!

Description

Singularity Computers has created a CPU water-block which is compatible with both Intel Socket 1700 and AMD Socket AM5!

Not feeling that clear block look? Now, enter PPCS's creativity, we would like to offer our customers more colors for the block and the hardware screws. At PPCS we can professionally Cerakote your block in any color almost and give you a choice of 7 anodized screw colors. With these choices, you can make this block look custom to your system in amazing looking colors! Check below to build this block exactly how you wish it to look and don't worry we left the sides of the block clear so that your RGB lighting can still be seen. It's a very cool look!

It can be used as a normal CPU water-block or as a direct die water-block. We wanted to create a CPU water-block which can do everything and comes at a reasonable price. The water-block is compact with a simple design making installation easy. The included stand offs are the correct length so that when the fasteners bottom out the correct tension is achieved. The water-block is non directional so either port can be used as inlet or outlet. The water-block has an integrated PCB which has both UV and ARGB LEDs and a switch to select between them.

Features

Installation:

Compatible with Socket 1700 and Socket AM5 and can be used as a normal water-block or direct die. Inlet outlet can be used in either direction. Please see documentation.

Specifications

Specifications & Included Items.

- Plasma CPU Water-block. Nickel Plated CNC Machined Copper. CNC Machined Clear Cast Acrylic. Clear Silicone Gasket.
- Stainless Steel or anodized aluminum Fasteners.
- G1/4" Threads x2.
- PCB with integrated ARGB and UV LEDs and a selector switch.
- Spare Gasket: Clear Silicone.

Additional Information

Brand	Singularity Computers
SKU	SC-WB-PLS-CPU-DD-PPCS
Weight	1.5000
CPU Series	AM2 / AM2+ / AM3 / AM3+ / FM1 / FM2 / FM2+ / AM4 / AM5 - LGA 115x / 1200 / 1700 / 2066
Block CPU Type	Intel/AMD
Block Style	Copper-Nickel
