

Koolance Pressure Valve

\$6.99

Product Images

Short Description

The VLV-VL002K safety valve releases built-up air pressure in situations of corrosion. The pressure valve is designed to be screwed into the Koolance Fill Port, where it replaces the nozzle plug.

Description

The VLV-VL002K safety valve releases built-up air pressure in situations of corrosion. The pressure valve is designed to be screwed into the Koolance [Fill Port](#), where it replaces the nozzle plug.

Using 3rd-party cooling components and blocks voids the Koolance system warranty. If doing so however, this product is recommended to help avoid potential damage caused by bare copper and aluminum.

NOTE: This product should not be necessary for systems using only Koolance water cooling products

Features

NOTE: Liquid Coolants Koolance's product warranty does not cover the use of 3rd-party coolants, coolant additives, or corrosion. Koolance LIQ-702 or LIQ-705 coolants are strongly recommended to help avoid issues with mixed metals or biological growth. Additionally, do not use aluminum with bare (unplated) copper or bare (unplated) brass in the same system. Do not use silver with nickel in the same system.

Additional Information

Brand	Koolance
SKU	VLV-VL002K
Weight	0.2000
Special Order	No
Fitting Type	Valve
Fitting Angle	Straight
Vendor SKU/EAN	829596902327
