Short Description

Product Details:

PPA USB 2.0 to eSATA Adapter

Expanding today's technology, the PPA USB 2.0 to eSATA adapter conveniently connects your computer to the SATA enclosure world. Now, PowerMac G4/G5 as well as PC systems equipped with SATA host adapters can easily share data with non-SATA host computers as the PPA USB to eSATA converter eliminates the need for an SATA host connection. Allowing access directly from any USB 2.0 port, the PPA USB to eSATA adaptor extends hard drive space for almost any application, including laptop, Mac mini and iMac environments.

The PPA USB 2.0 to eSATA adapter supports SATA 150 and SATA 300 hard drives, works with any external eSATA hard drive enclosure and can be used with SATA "Type L" ports with the proper adapter cable. The adapter also supports hot swap, SATA PM, spread spectrum clocking and is compatible with USB 2.0 specifications. Adapter's compact design allows use with all portable devices as well as desktops.

Features

- Compliance with Gen1i, and Gen1m of Serial ATA II Electrical Specification 1.0
- Supports SATA Spread-Spectrum Clock
- Supports SATA II Asynchronous Signal Recovery (Hot Plug) feature
- Compliance with USB 2.0 electrical specification
- Supports USB High-Speed and Full-Speed Operation
- Compliance with USB Mass Storage Class, Bulk-Only Transport Specification
- Supports ATA/ATAPI PACKET command set
- Supports ATA/ATAPI LBA48 addressing mode
- Backward Compatible with USB 1.1

Minimum System Requirements: IBM or compatible systems with a PII - 233 Mhz or faster processor, One available USB port on Your computer, CD-ROM, Windows me / 2000 / XP, Mac OS X or Higher

What's In The Box

- One USB 2.0 to eSATA Adapter
- One Driver CD
