

Koolance 80-120mm Chassis Grill Adapter

\$15.95

Product Images

Short Description

Product Details:

The Koolance Chassis Grill Adapter enables the Koolance Aquian ICM cooling unit or 120mm fans to fit most chassis with rear 80mm fan grills. The bracket is adjustable, and allows a 120mm fan to be mounted inside or outside the computer chassis. Included is a 120mm grill and mounting screws for the adapter (fan not included).

It is recommended to check the width of the Aquian and compare it with the total width of your chassis. Some 80mm rear grill cases may still be too narrow for an ICM cooling unit (without conflict from the motherboard or side panel).
