Short Description

The Koolance spacer for Intel LGA775 boards works with the Koolance [LGA775 rails](#). It is designed for motherboards with tall capacitors near the socket that may conflict with the Koolance CPU-300 cooler.

Description

The Koolance spacer for Intel LGA775 boards works with the Koolance [LGA775 rails](#). It is designed for motherboards with tall capacitors near the socket that may conflict with the Koolance CPU-300 cooler.

The gold-plated, high density copper spacer is installed in between the processor and the CPU-300 cooler to provide clearance on these motherboards. (Thermal paste should be applied to both sides of the spacer during installation.) The spacer is approximately 1.73" (44mm) in diameter, and 0.12" (3mm) thick.

Additional Information

Brand	Koolance
SKU	SPC-CP775K-D
Weight	0.1000
Color	Silver
Block Accessory Type	Mount Plate
CPU Series	Intel 775
Block CPU Type	Intel
Special Price	\$4.49
