Short Description

The Coolink Silent Savior HDD-Cooler features super-silent operation (9-16dB/A), outstanding reliability, excellent cooling performance and extremely easy installation. Many HDD coolers with multiple smaller fans or cheap sleeve-bearing fans quickly turn into annoying sources of noise. The Silent Savior is equipped with a large Coolink SWiF 801-L quality fan whose high precision double ball bearing ensures excellent longevity. Thanks to its 80mm size, the SWiF 801-L achieves a whopping 30m³/h at only 9-16dB/A - more than enough to cool a HDD.
