Short Description

The Nirvana NV120 Premium (1) - it's simply the best-performing 120mm air-cooling CPU in the industry. The NV120 Premium boasts an efficient 8-line, heat-pipe design, an innovative honeycomb structure for optimized airflow, and a manual fan speed controller you can place anywhere.

Description

ZEROtherm Nirvana NV120 CPU Cooler

The Nirvana NV120 Premium (1) - it's simply the best-performing 120mm air-cooling CPU in the industry. The NV120 Premium boasts an efficient 8-line, heat-pipe design, an innovative honeycomb structure for optimized airflow, and a manual fan speed controller you can place anywhere. Compatible with the latest Intel and AMD CPUs, the NV120 Premium runs in near silence at 19dBa 1500-rpm, 40dBa maximum at 3300-rpm. And with its pure copper base and heatpipe, and Cr/Ni-plated aluminum fins, the Nirvana NV120 provides superior heat dissipation to ensure that your system runs to its full potential. This easy-to-install CPU cooler offers superior performance at an affordable price. Perfect for today's most extreme AMD and Intel-based systems.

Features

Best Performance among 120mm air cooling CPU coolers

Effective 8-line Heat pipe effect

Honeycomb structure for optimized air flow. More than 6,748 cm² heat dissipation area

120mm fan for max. air-flow (up to 84.7 CFM)

Manual fan speed
Controller Adapted
(Place it anywhere)

Silence Innovations
Min. 19 dBA at 1,000
rpm
Max. 39 dBA at 2,300
rpm

Polished NI-Plated
Copper Base

Support Latest Intel &
AMD CPUs

Additional Information

SKU	NV120-PREMIUM
Weight	3.0000
Material	Copper/Aluminum
Fan Dimensions	120mm
Fan Connection	4-Pin
