Description

New, great looking reservoirs from Bitspower are a statement in style and quality construction. Best used with your choice of Bitspower shiny silver fittings and can join to the X1 docking. The base has the drain hole position which facilitates the fill and drain of fluid. Like all Bitspower components these are some of the most premium products in the water-cooling industry. This is the perfect new addition to your new water-cooled PC!

Features:

- Reservoir main body and top made of high quality acrylic
- Reservoir lower portion made of POM
- Convenient size for installation in many places
- Multiple uses with 3 ports to use in single or double loops
