

Silverstone Aero Slots - 4 Vented Expansion Slot Covers for Improving Rear Airflow

\$6.99

Product Images

Short Description

SilverStone' s Aero Slots, evolved from the vented slots first utilized in the prestigious Temjin TJ10 performance tower chassis, are designed with optimal venting ratio to increase airflow efficiency without negatively affecting EMI (Electromagnetic Interference) emission. Finished with beautiful Nickel- coated black surface, the Aero Slots can add greatly to the aesthetic appearance of any case while improving cooling performance when used with hi-end graphic cards or hot-running expansion cards.
