\$69.00

Product Images

Short Description

This service can be chosen if you wish us to professionally install a triple 3x120mm or 3 x 140mm Radgrill on your case.

Description

This service can be chosen if you wish us to professionally install a triple 3x120mm or 3 x 140mm Radgrill on your case. This only includes the labor for this service and you must also add to your cart a Radgrill, as well as, a computer case. It would be best to call or email first to make sure that the radgrill install for the case that you choose is possible, and the right choice for you. Modified cases are not returnable for any reason! You can include in the comments of your order any special measurements or location for your rad grill install.

For Radgrill choices choose one of these 3X120/140mm Radgrills only! ==> [HERE](#)

RadGrills are specially designed & made for watercooling radiators. These RadGrills function as fanguards for your single / multiple fan radiators. Precision cut from high quality material (available in Aluminum or Stainless Steel).

Aluminum Black (anodized) gives a cool matte black look and is ultra lightweight. Stainless Steel, the highest grade steel with high hardness & strength, gives a high-value polished look. Add on the cool superior look to your watercooling with RadGrills. All RadGrillz are designed with airflow in mind for great looks *and* great performance.
