Short Description

Product Details:

To make the venerable Temjin TJ10 even better, SilverStone implemented an ESA controller that works with ESA certified motherboard to provide full system monitoring and thermal control. With 100% control over five 120mm LED case fans, three lighting devices, and four temperature sensors, the user can setup multiple profiles for all types of computing experience requiring exact performance to noise parameters. In addition to the excellent ESA feature, the TJ10 ESA edition also retains the best qualities from the original case such as the mid-section fan dedicated to graphics card cooling, removable motherboard tray, and pop-up front I/O ports, etc... For enthusiasts that need to have precision control of their equipment and want an outstanding design, this is the chassis to have.

Features:

- ESA certified for full system thermal management
- Premium all-aluminum chassis for extended ATX, ATX, SSI motherboards
- 120mm fan only design for ultimate performance & quietness
- Unprecedented air duct dedicated for graphics card cooling
- Advanced structural engineering with superior chassis stiffness
- User friendly layout with multiple tool-less access
- Classic SilverStone styling and finish

Specifications:
