Description

This water temp probe is a push-in system. You can push it into a t-piece or into the compensation tank. A sensitive analogue sensor is embedded in the plug. Up to 6 water temp probes can be connected to the T-Balancer. The plug is made of aluminium to ensure an optimal heat conductivity.

Specifications:

- Cable length: 80cm
- Diameter: 10mm
- Material: pure Aluminium

Please Note:
If other cooling components in the water cycle are of other materials than aluminium, you have to add anti- corrosion fluids!
