

mCubed Vertical Silence - HDD Cooler - Black

\$69.95

Product Images

Short Description

The Vertical Silence is a hard disc cooler, which is designed especially for passive cooling. It is the only one with vertical designed heatsinks, which allows an optimal air convection without an active fan cooler.

Due to the combination of different technologies an optimal cooling and an effective noise reduction can be reached at the same time.

Description

The Vertical Silence is a hard disc cooler, which is designed especially for passive cooling. It is the only one with vertical designed heatsinks, which allows an optimal air convection without an active fan cooler.

Due to the combination of different technologies an optimal cooling and an effective noise reduction can be reached at the same time.

Features

Vertical heatsinks

Traditional hard disk coolers have horizontal designed heatsinks, which is optimized for active fan cooling. The heatsinks of the vertical silence are vertically designed. Warm air can easily go up through the heatsink and take away the heat. Cool air can follow (natural convection of air). In addition the heatsinks have special designed lamellas which enforce the cooling abilities.

Double decoupled

The whole box is fixed with anti vibe rubbers to the chassis. In addition the whole hard disk is covered with anti noise insulating mat.

Copper heat conductors

Special copper heat conductors ensure, that the heat of the hard disk will be transported to the heatsinks on each side.

Aluminum

The hdd cooler is made of pure massive aluminum, which is black anodized. This ensures a good heat conductivity.

Mounting

The mounting is very easy. All you need is an empty 5.25" bay in your chassis. The cooler itself needs no screws and screwdrivers. Just plug all components together, put the hard disk inside and close the cover! The Vertical Silence is also suitable for transporting the PC. The hard disk is very secure in this massive designed box.

Specifications

- Fit in every 5.25" bay
- For 3.5" HDD (IDE and SATA)
- Mounting holes like CD drives
- 145*40*175mm
- 626g

Additional Information

SKU	MC-00620
Weight	3.0000
Color	Black
Case Accessory Type	Bay Hardware
