Short Description

Our customers asked us to make the highest performance heatsink possible. We not only did that, but we managed to do it at the lowest noise levels as well! Introducing the IXC-92HA2, the IXC-120HA2's little brother.

Description

Our customers asked us to make the highest performance heatsink possible. We not only did that, but we managed to do it at the lowest noise levels as well! Introducing the IXC-92HA2, the IXC-120HA2's little brother. With a thermal resistance of 0.12°C/W, we're talking 375 watts of heat dissipation at room temperature! The heatpipes are enormous 8mm ones that have twice the heat capacity of the smaller 6mm units on our competitors. We won't kid around by multiplying the number of heatpipes by two as our competitors seem to do, no need to do that when we embarrass their products on the benchmarks! And to achieve that with lower mass, you won't need to fiddle around with the mess of exotic watercooling. Installation couldn't be simpler, no need to remove the motherboard, just snap in and latch the levers, someone with no computer background can mount it in a minute or two tops. Includes a fan controller for precise manual control over the fan noise.

Specifications

sku	IXC-92HA2
rated dba	9-24
dimensions	102.4 x 88.2 x 124.8mm
base material	Copper Heatpipes, Aluminum Plates
fin material	Aluminum Fins
fin surface area	5000cm ²
weight	445g
rpm	1000-2000
cfm	20-55
current draw	0.16-0.30A
power consumption	1.92-3.60w
bearings	FDB, fluid dynamic bearings
cpu compatibility	Socket 754, LGA775, 939, 940, AM2

Additional Information

Brand	SilenX
SKU	IXC-92HA2-D
Weight	3.0000
Material	Copper/Aluminum
Fan Dimensions	92mm
Fan Connection	4-Pin PWM
Special Price	\$24.95
