Description

Revision C model of this great fan from Delta's AFB line has arrived!

The AFB1212GHE Revision C Grand High Speed is the newest king of 120mm fans. This DC fan motor provides over 240 cubic feet of air out of a traditional design that has been highly refined and tuned by Delta's fan motor team. Comparisons with our other high end Delta parts show it has modest power requirements for its ability to move so much air out of the standard 120x38 millimeter form factor. It does lack the directional blades which we've all come to know as Delta's patented design, which helps airflow move more consistently straight out of the fan housing. However, as noted in its lower decibel rating, it will also lack the high pitched whine that accompanies directional fin fans. The AFB parts can be undervolted

slightly more, but apparently cannot be overvolted as much. For power users adjusting the voltages on these parts, it will be a welcome change.

Fan cable is fully sleeved in nylon Techflex sleeving and Premium Heatshrink, colors of your choice.

Additional Information

Brand	Delta Electronics
SKU	AFB1212GHE-CF00
Weight	1.5000
Color	Black
Fan Dimensions	120mm
Fan Width	38mm
Fan Connection	3-Pin
Fan Voltage	12 VDC
Fan RPM	5200
Fan CFM	241
Fan Noise (dB)	62
