

Single Molex to PCI Express 8" - Sleeved

\$6.95

Product Images

Short Description

Now you can use your current non-PCI Express Power Supply with that new motherboard that supports a PCI Express Video card. This power cable has a proprietary six-pin plug on one end that connects to your PCI Express video card with the other end connecting to a single Molex connector of your power supply.

Description

Product Details:

Now you can use your current non-PCI Express Power Supply with that new motherboard that supports a PCI Express Video card. This power cable has a proprietary six-pin plug on one end that connects to your PCI Express video card with the other end connecting to a single Molex connector of your power supply. This is the perfect savior if you just spent a ton of money on an expensive power supply that does not support PCI Express.

Note: This will only work on some PSU's that have a high enough 12V rail to support your video card.

Cable is fully covered in nylon Techflex sleeving and premium heatshrink, colors of your choice!
