Short Description

Acrylic is a useful material for all modders - mod your own side panel, create an acrylic front for your casing, a bay front cover, watercooling tank, drive cage, PSU cover, fan guard, the possibilities are limitless. TIP: mount lighting (CCFL or LEDs) by the side of the AcrylPanel - cool lighting effect is amazing.

## Description

---

A typical use for 5mm is side windows, but let us not deter your imagination.

This Black is actually a translucent black (smoke color) and is great for a all-black look, always cool.

Acrylic is a useful material for all modders - mod your own side panel, create an acrylic front for your casing, a bay front cover, watercooling tank, drive cage, PSU cover, fan guard, the possibilities are limitless. TIP: mount lighting (CCFL or LEDs) by the side of the Acrylic - cool lighting effect is amazing.

Easy to cut, durable and non-breakable.
