Short Description

The HT external is a premium external assembly laid out with heat exchangers. Derived from the design of the HT, this product makes for a simple installation of a water cooling radiator and easy addition to case tops a possibility.

Description

The HT external is a premium external assembly laid out with heat exchangers. Derived from the design of the HT, this product makes for a simple installation of a water cooling radiator and easy addition to case tops a possibility. The very efficient HTSF core, the outer skin of the HT was integrated and is completely made of polished high-grade steel that is specifically manufactured

for heat exchange. The radiator internally possesses the possibility of installing two 120mm exhausts. The hoses can be implemented downward, as well as to the rear. In addition, the HT external is supplied with anti-vibration rubber feet, can be bolted on firmly to the housing.

Specifications

- Material: Pipes copper, fins aluminum, housing high-grade steel polished
- Measures outside (L x B x H): 325 x 180 x 85mm
- Weight: approx. 1200g
- Pressure tested to: 20 bar
- Surface: black coats
- Connection: 2x thread G 1/4"

Scope of supply:

- 1x HT external dual
- 1x assembly material
