Short Description

This USB 2.0 to external SATA Adapter allows you to connect a SATA or eSATA drive to your computer through an available USB 2.0 port - essentially converting the USB port to an external Serial ATA port.

Description

Product Details:

This USB 2.0 to external SATA Adapter allows you to connect a SATA or eSATA drive to your computer through an available USB 2.0 port - essentially converting the USB port to an external Serial ATA port.

Ideal for 2.5in or 3.5in optical drives and eSATA enclosures, this convenient adapter offers a cost-effective solution that lets you quickly connect Serial ATA based devices for testing and transferring files without having to open the computer chassis.

Applications:

- Connect any SATA hard drive to a PC equipped with a USB port
- The perfect solution for quickly testing and swapping SATA hard drives

Features

Features:

- Connect any 3.5" or 2.5" SATA or eSATA drive to a USB port
- No drivers required for Windows ME/2000/XP/Vista, Linux, MAC OS X and up
- Supports 48-bit LBA addressing for large capacity drives
- Supports USB 2.0 data transfer rates up to 480Mbps and backwards compatible with USB1.1 at 12Mbps
- With USB connectivity you can easily install and hot-swap drives without shutting down your computer
