Additional Information

Brand	Gelid Solutions
SKU	TC-GC02-A
Weight	0.3000
TIM Type	Paste
Vendor SKU/EAN	4897025780262
Internet Reviews	<i>Recommended & Awarded by I found the GC-2 compound very easy to use and spread on both the IHS and the base of a few cooler types I tried it on. With the four thermal pastes I tried including the previous GELID Solutions compound, I found the GELID Solutions GC-2 thermal compound to be the best performer. GC-2, in our lab-like environment of testing, performed just shy of 2° Celsius better than the previous one, and more than a degree better than both of the others tested. Great job on the new thermal compound, it makes it to the top three as far as what thermal compound I would purchase. Tweaktown.com GELID Solutions previously impressed us with their previous paste and we are left with a similar impression of GC-2. Their new thermal compound exceeds the performance of Arctic Cooling's MX-2 under load and idle conditions which makes it our first choice in any system build. Driverheaven.net</i>
