Description

Convert DC power to DC power with this fully assembled , variable 12V to 24V step-up converter module which assists in maintaining a power source for your device or application. Also offered a Performance-PCs.com fully modded in house version. This ready to install version comes in a sealed test box with 4-pin Molex in 12v to PSU and 24V out to accessory, as well as, ON/OFF switch, and dual 40mm fan cooling! For those that are not good at wiring this is a nice, ready to go package

Features:

- Soft-start function reduces current rush during start up
- Output switch is protected by current limit, under-voltage lockout and thermal shutdown
