Short Description

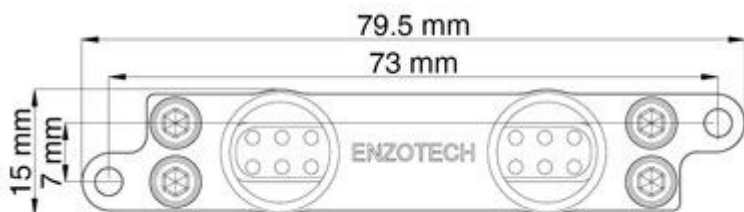

The Enzotech WMST-73 Forged Copper Mosfet Waterblock was designed to offer exceptional heat dissipation for integrated MOSFET motherboards cards. WMST-73 Waterblock is made using a forged copper process which produces a dense material that is extremely efficient at heat extraction.

Description

The Enzotech WMST-73 Forged Copper Mosfet Waterblock was designed to offer exceptional heat dissipation for integrated MOSFET motherboards cards. WMST-73 Waterblock is made using

a forged copper process which produces a dense material that is extremely efficient at heat extraction. The MST-73 Waterblock is far superior to traditional heat sinks currently found on the market and it provides the best thermal conductivity available to dissipate heat from the MOSFET in your system.
