

PPCS "Clean-Cable Series" Power Cables - 3 x Molex - Sleeved

\$16.95

Product Images

Short Description

These handmade cables are perfectly measured and designed so the wiring lays flat on your HDD and optical drives when stacked in drive bays. Instead of using sleeve between drives we leave bare wires so their is not loop or lump of cables between drives. That along with the black wiring makes the cable almost invisible between drives! The result of using these cables is a much more organized cabling system inside your PC which also helps with better air flow and better cooling.

Description

Once again Performance-PCs.com is a trend setter with our beautiful Custom made "Clean-Cable Series" power cables!

These handmade cables are perfectly measured and designed so the wiring lays flat on your HDD and optical drives when stacked in drive bays. Instead of using sleeve between drives we leave bare wires so their is not loop or lump of cables between drives. That along with the black wiring makes the cable almost invisible between drives! The result of using these cables is a much more organized cabling system inside your PC which also helps with better air flow and better cooling.

Don't settle for imitators! Performance-PCs.com is the original designer of these cables, as well as general

cable sleeving and cable uni-sleeving!

Cable is fully covered with Premium sleeving and heatshrink, colors of your choice!
