

Carbon Film Resistors -68 ohm 1/2W 5% - Pack of 5

\$0.99

Product Images

Short Description

These resistors are perfect for your DIY projects requiring soldering to your leads. This particular resistor of 68 ohms is commonly used to bring down the 3.3V source from a motherboard to 2.0V DC for use with such RED LED's found in switches which have a 2 volt max.

Description

These resistors are perfect for your DIY projects requiring soldering to your leads. This particular resistor of 68 ohms is commonly used to bring down the 3.3V source from a motherboard to 2.0V DC for use with such RED LED's found in switches which have a 2 volt max.

Specifications

- 68 ohm resistors
- 1/2-watt
- 5% tolerance.
- Max Working Voltage: 350V
- Lead Length: 28 ±3mm
- Temp Range: -67°F to 158°F
- Bag of 5 Resistors

Additional Information

SKU	RES-68-5
Weight	0.0100
