

# Carbon Film Resistors -100 ohm 1/2W 5% - Pack of 5

\$0.99

## Product Images

## Short Description

These resistors are perfect for your DIY projects requiring soldering to your leads.

## Description

These resistors are perfect for your DIY projects requiring soldering to your leads. This particular resistor of 100 ohms is commonly used to bring down the 5V source from a PSU Molex connector (red wire) to 3.3V DC for use with most bare wire LED's (such as [HERE](#)) that are rated from 2.9 to 3.3V.

# Specifications

---

- 100 ohm resistors
- 1/2-watt
- 5% tolerance.
- Max Working Voltage: 350V
- Lead Length: 28 ±3mm
- Temp Range: -67°F to 158°F
- Bag of 5 Resistors

# Additional Information

---

SKU	RES-100-5
Weight	0.0100
