

Carbon Film Resistors -100 ohm 1/2W 5% - Pack of 5

\$0.99

Product Images

Short Description

These resistors are perfect for your DIY projects requiring soldering to your leads.

Description

These resistors are perfect for your DIY projects requiring soldering to your leads. This particular resistor of 100 ohms is commonly used to bring down the 5V source from a PSU Molex connector (red wire) to 3.3V DC for use with most bare wire LED's (such as [HERE](#)) that are rated from 2.9 to 3.3V.

Specifications

- 100 ohm resistors
- 1/2-watt
- 5% tolerance.
- Max Working Voltage: 350V
- Lead Length: 28 ±3mm
- Temp Range: -67°F to 158°F
- Bag of 5 Resistors

Additional Information

SKU	RES-100-5
Weight	0.0100
