

Carbon Film Resistors -470 ohm 1/2W 5% - Pack of 5

\$0.99

Product Images

Short Description

These resistors are perfect for your DIY projects requiring soldering to your leads.

Description

These resistors are perfect for your DIY projects requiring soldering to your leads. This particular resistor of 470 ohms is commonly used to bring down the 12V source from a PSU Molex connector (red wire) to 3.3V DC for use with most bare wire LED's (such as [HERE](#)) that are rated from 2.9 to 3.3V.

Specifications

- 470 ohm resistors
- 1/2-watt
- 5% tolerance.
- Max Working Voltage: 350V
- Lead Length: 28 ±3mm
- Temp Range: -67°F to 158°F
- Bag of 5 Resistors

Additional Information

SKU	RES-470-5
Weight	0.0100
