

Alphacool Ultra Pure Water 1000ml

\$6.79

Product Images

Short Description

This extremely pure water made just for Alphacool directly from a high-grade reverse osmosis system. Cleaned with 5 special filters (one of which is a special reverse osmosis filter) the water is absolutely free of salts, metals and contaminants which are in tap water. The treatment removes virtually any contaminants

and unwanted substances in the water.

Description

This extremely pure water made just for Alphacool directly from a high-grade reverse osmosis system. Cleaned with 5 special filters (one of which is a special reverse osmosis filter) the water is absolutely free of salts, metals and contaminants which are in tap water. The treatment removes virtually any contaminants and unwanted substances in the water.

Hence the water leaves no stains when evaporating and no lime scale deposits form.

Made in Germany.

Features

The advantages:

- Virtually completely electrically non-conductive and absolutely contaminant-free (< 0,1µS/cm, approx 100 times less than in standard distilled water)
- No limescale or other residues if evaporated
- Without any additives: Full thermal conductivity and no interaction with other additives
- Compatible with all available PC watercooling systems

Additional Information

Brand	Alphacool
SKU	AC-17313
Weight	2.0000
Color	Clear
Fluid Type	DI Water Based
Volume	1 liter
Vendor SKU/EAN	4250197173131
