Description

The Enzotech AS-REII-SN Waterblock was designed to fit on RAMPAGE II EXTREME MB. The optimal channel design make sure all chips cooled evenly and get more heat off from your board. You may enjoy the performance of your board while exercising the Enzotech AS-REII-SN Waterblock.

Specifications:

The technical drawing illustrates the Enzotech AS-REII-SN Waterblock and its associated components. On the left, five screws of varying lengths are shown. In the center, the waterblock is depicted with a top view showing a square cooling area and a side view showing the 'X58 RE II' branding. To the right, a square mounting bracket with four corner holes is shown. Below the waterblock, a radiator with six horizontal cooling fins is shown, connected to the waterblock by a tube. The Enzotech logo is visible on the side of the waterblock.
