

Bitspower Mini Dual G1/4" High Flow Fitting - Shiny Silver Finish

\$5.49

Product Images

Description

This is a mini dual G 1/4" threaded (male to male) fitting. Uses an O-Ring to seal. Large ID bore for high flow and lower pressure

drop compared to other fittings. This is perfect for use with Delrin T's and L's. It will screw in to the available port. Using a Delrin 90 degree L an one of these fittings plus one regular barb is perfect for use the lower PCI Express video card in SLI. This keeps the barb from hitting the floor of the case or lower mounted PSU by quickly changing the flow in a 90 degree manner. This new fitting has the smallest spacing available between barbs making it perfect for user's applications that require extremely limited space. Learn the name; Bitspower Premium water cooling products! Great looking new black matte finish.

Features

- True Hi-Flow Design.
- Hi Quality Brass Material.
- High durability silver shiny finished.
- Hiding O-Ring Design
- Smallest footprint available
- RoHS Compliant.
