Short Description

This momentary on/off vandal switch cable assembly is the ideal for modding enthusiasts that have a vandal switch but need a cable assembly to control it.

Description

This momentary on/off vandal switch cable assembly is the ideal for modding enthusiasts that have a vandal switch but need a cable assembly to control it. This cable is for Momentary Style (PUSH TO ON, like power and reset switch) Vandal switches and is meant to plug the 2 1x1 KK headers on the mobo 3.3V PWR or HDD LED and the 1x2 KK to the Power Switch. Switch LED is always on for Power or will flicker to the HDD access if plugged on this.

Note: This cable is ready to go with slide on spade-style connectors. Comes stock with black wires but, you can pay for us to do the sleeving and heatshrink in the colors of your choice. This can be found in the options below.

Specifications

Specifications:

- 23" cable length
- Wires black via factory
