Especially in the 46mm thick version shown here, developed the larger surface of the copper plate is an absolute top performance.

Description

Magicool's range offers absolute top cooling performance, excellent finish and processing. The full-copper radiators offer an optimal heat dissipation and are excellent water coolers. Especially in the 46mm thick version shown here, developed the larger surface of the copper plate is an absolute top performance. The special form for 80mm fan is ideal for cases with little space or even for the last still remaining in the housing space to exploit. In the end, the ideal complement to existing systems to increase their performance again. Moreover, the smaller radiator is a useful feature for case modders, which are found because of the unusual forms of housing for other sizes use ... Double-sided fan assembly is possible by the metrical threads. For easy installation of all systems connecting two fittings with G 1/4 inch thread are integrated.
