Short Description

Product Details:

Phobya's new masterpiece of cooling technology!

This is a fan that will satisfy both Silent-PC users and performance-oriented PC builders which is unique on the fan market. This innovative fan will bring fear to its competitors and keep your system cool with all of its great features!

The manufacturer's consortium Phobya has achieved that an increased Airflow does not necessarily result in higher noise emissions by using an innovative fan blade design. The specially curved fan blades in combination with the unique design and high fan blade density lead the way to the future of cooling! The bearing is quipped with the newest Nano technology which greatly reduces friction and noise emissions. The innovative motor design in combination with an optimally chosen fan speed does the rest to provide exceptional performance and quiet operation.

At full speed even the most modern fan will become audible. Therefore the Phobya fans are designed to handle lower voltages well which allows operation in a voltage range of 5-12V. This gives the option of a virtually inaudible operation whilst a strong Airflow will still keep your system

cool. The fan is shipped with cables for voltage reduction. These cables reduce the voltage to 7V or 5V as desired. All cables are sleeved black which supports the elegant and sleek appearance of the fan.

The appearance nowadays also is an extremely important factor when considering a fan. The red fan blades in combination with an elegant transparent frame and red LEDs, completely in an elegant glossy finish result in a truly spectacular appearance of this fan which is a great choice for any system!

Specifications:

Dimensions: 120x120x25mm

Color: Transparent frame, red fan blades & red LEDs

Weight: 119g

Nominal voltage: 12V

Starting voltage: 5V

Current draw: 0,2A

Nominal speed: 1500rpm (+/- 10%)

Airflow: 97,20m³/h / 57,22 CFM

Noise emission: 25 dB(A)

MTBF (25°C): 50.000hrs

Connector: 3Pin

Includes:

1x Phobya G-Silent 12 1500rpm Red LED (120x120x25mm)

4x Fan screws
