

Phobya Front Faceplate - 2 Displays - Black

\$14.95

Product Images

Description

This Phobya slot faceplate is the last piece for installing the common digital temperature displays in the front of your case.

The faceplate is made from black powder coated steel and is compatible with any 5,25" drive bay. For mounting of the faceplate it can simply be pushed into the free slot and is fixated on the sides with the included M3 screws. The front is plane and all edges are deburred. The elegant front screws optimally supplement the elegant appearance of the faceplate.

As this faceplate allows a free choice of displays to be installed both the choice of colours and sensors is virtually unlimited, making every front display a unique piece!
