Short Description

Phobya presents the solution for external mounting of radiators! The largest component of water makes for the corresponding lack of space in the housing. Where to put it? A smaller radiator maybe? These issues are now no longer a problem! ?

Description

Phobya presents the solution for external mounting of radiators!

The largest component of water makes for the corresponding lack of space in the housing. Where to put it? A smaller radiator maybe? These issues are now no longer a problem! ?

Outside of the housing is room enough for every conceivable model. Imagine the radiator on the floor or on top of the housing, they attach to the wall or at your desk, no matter where you put it with this bracket, you can be sure that there is always enough room for air circulation.

The mounting device has been designed so that even if it was only attached on one side of a radiator, the bracket is still firmly on the ground. At the bottom are also openings for fastenings, so the radiator could be mounted with its attachment to the wall or other places.

The fitting of the radiator and / or the fan on the panel is made with ease. The mounting holes are cut so large that it can take both M3 and M4 screws, depending on what's needed for radiator mounting bolts.

The bracket is made of SC-steel, black powder and the surface is very smooth. All edges have been trimmed and the corners rounded off, so the bottom line: Good work!

Specifications

- Height: 152mm
- Length: 387mm
- Thickness: 2mm
- For 360mm radiators.

Additional Information

Brand	Phobyia
SKU	PH-52123
Weight	0.3000
Color	Clear
Pump Type	DDC
Material	Acrylic
