Short Description

The circumaural, closed-back design offers the long-term playing comfort and immersive multi-channel audio that you demand as

a gamer, with a unidirectional noise-cancelling microphone that lets you be heard loud and clear, and audio controls that are easy to use without taking your head out of the game.

Description

Product Details:

The circumaural, closed-back design offers the long-term playing comfort and immersive multi-channel audio that you demand as a gamer, with a unidirectional noise-cancelling microphone that lets you be heard loud and clear, and audio controls that are easy to use without taking your head out of the game.

And because you can't design a great gaming headset without first building a superior pair of headphones, the HS1 uses massive 50mm drivers and carefully tuned acoustical design for pristine reproduction and no-compromises enjoyment of your favorite music and multi-channel movies.

The rugged, compact design with replaceable earpads complete the HS1's mission of not only being an audio weapon of choice for intense gaming sessions, but a well-loved piece of enthusiast gear that will meet all your audio needs.

Amazing Sound

Massive, 50mm drivers greatly reduce the overloading that can occur with 40mm headsets. They deliver more accurate sound reproduction, particularly for low-frequency effects. And, they're less likely to cause the distortion that can make it hard to discern voices and other important audio cues when everything is coming at you fast.

In short, you'll hear more audio, more cleanly, giving you a competitive advantage.

Intense, Immersive Gaming

The circumaural, closed-back design blocks distracting sounds and keeps your head in the game. Dolby® Headphone surround sound lets you enjoy multi-channel games the way they were intended to be played, with positional cues that put you into the environment in a way that stereo headsets simply can't.

The clear, low-noise reproduction of the unidirectional noise-cancelling microphone lets your teammates hear you better, and the extra-large inline volume and microphone control is easy to grab and use when the action heats up – you don't need to take your eyes off the screen.

Built for Comfort

Not only do the soft, plush fabric earcup covers have better acoustic properties than leatherette – they're also better at absorbing moisture, too. Underneath, memory foam earpads provide a comfortable, reliable fit that conforms to the shape of your head without binding or pinching.

Not just for games – great for music and movies, too

We began with an obsessive approach to earcup design – tuning and re-tuning the orientation of the 50mm drivers and the baffle geometry to deliver a frequency response curve that reproduces every bit of sonic detail. The result is a headset that truly respects the music.

We added surround sound with Dolby® Headphone technology, so you can enjoy the multi-channel audio that brings so much to the cinematic experience – even 7.1 channels from Blu-Ray discs.

Features

Features

- Massive 50mm drivers for high-quality audio reproduction
- Frequency response tuned to deliver serious gaming punch without sacrificing audio quality for music and movies
- Circumaural, closed-back earcups for superior noise isolation
- Replaceable memory foam earpads with fabric covers for a firm fit without binding or pinching

Specifications

Specifications:

Headphones

- Frequency response: 20Hz - 20kHz
- Impedance: 32 Ohms at 1kHz
- Dynamic range: 93dB A-wtd
- USB power consumption: 250mW
- Drivers: 50mm
- Cable: 3 meters
- Connector: USB Type A

Microphone

- Type: Unidirectional noise-cancelling condenser
- Impedance: 2.2k Ohms
- Frequency response: 200Hz - 10kHz +/- 2dB
- Sensitivity (1mW, 1KHz): -45dB +/- 2 dB

Additional Information

Brand	Corsair
SKU	CA-HS1-D
Weight	5.0000
Color	Black
Ear Connection	Circumaural
Connection Type	USB
Special Price	\$74.96
