

Das Keyboard Ultimate S Silent Keyboard

\$134.95

Product Images

Short Description

Product Details:

Das Keyboard Model S Ultimate Silent is blank, with no inscriptions on the keys. It features high-end, mechanical key switches that click less than its cousin, the Model S Ultimate. This quieter model is ideal for people working in an open environment or for workers who need to type while talking on the phone. The Model S Silent keeps its outstanding tactile feel. The other features are identical to the Model S Ultimate, including a two-port USB 2.0 hub and newly redesigned electronics that provide full n-key rollover.

Features:

German-engineered mechanical key switches:

Das Keyboard compares to the legendary IBM Model M. Its best-in-class mechanical gold-plated key switches provide a tactile and audio click that makes typing a pure joy.

USB 2.0 hub:

The high-speed USB hub allows you to sync and charge your iPhone, iPod or any USB compatible devices.

Extra-long USB cable:

Das Keyboard sports a 2-meter (6.6ft) cable that goes through your desk grommet to keep your workspace neat and tidy.

N-key rollover:

Model S allows full n-key rollover with a PS2 adapter, and 6 keys with USB. Great for fast typists and gamers alike.

Specifications:
