Short Description

The ARCTIC HC 01-TC is a hard drive cooler for 3.5" hard drives. The 5¼" case incorporates the drive and isolates it with absorption foam, so that no noise is transferred from the drive to the case. A temperature controlled 40mm fan helps to cool the drive.

Description

The ARCTIC HC 01-TC is a hard drive cooler for 3.5" hard drives. The 5¼" case incorporates the drive and isolates it with absorption foam, so that no noise is transferred from the drive to the case. A temperature controlled 40mm fan helps to cool the drive.

Features

Advanced Temperature Control Function

The ARCTIC HC 01-TC employs temperature control technology that measures the temperature of the hard drive and controls the fan speed automatically - the warmer the hard drive gets, the faster the fan spins to dissipate the emitted heat.

Virtually Silent>

The ARCTIC HC 01-TC is a single cooling frame for hard drive that isolates it from vibrating with the chassis. This cooler also features absorption foam to eliminate vibration, spinning and excess noise of the running hard drive. The fan remains virtually silent at most times as the maximum fan speed is only activated when the hard drive is above 47°C.

Lowering noise and the temperature at the same time

Thanks to the combination of absorption foam and the temperature controlled fan, the ARCTIC HC 01-TC not only lowers the noise emitted from the hard drive, it also lowers the temperature.

Specifications

Dimensions (Packaging)	200 L x 155 W x 45 H mm
Dimensions (Product)	186 H x 145 W x 43 H mm
Compatibility	3.5" SATA Hard Drive
Application	5.25
Fan (mm)	40
Rated Fan Speed	1600 - 4600 RPM, (Temperature Controlled Fan)
Material	Steel
Model #	PCACO-HC00100-GB
Weight	0.58 kg

Additional Information

Brand	Arctic
SKU	AC-HC01-TC
Weight	2.0000
Color	Black
Device Type	Hard Drive cooler
Bay Size	3.5" Bay
Special Price	\$9.99
