Short Description

We had to build a successor to top our new heatsink line and the EFZ-120HA4 was designed just for that role. An extreme performance heatsink designed for the most demanding gamers and overclockers, it'll satisfy any user in any application.

Description

We had to build a successor to top our new heatsink line and the EFZ-120HA4 was designed just for that role. An extreme performance heatsink designed for the *most demanding* gamers and overclockers, it'll satisfy any user in any application. It provides among the *best* thermal performance in the industry at the lowest noise levels possible. A combination of high performance and low noise in a package designed for use with 120mm fans, no need to push the limitations of your case space with a 140mm fan based heatsink! The EFZ-120HA4 utilizes five 8mm heatpipes that directly contact the CPU and are intertwined to provide ten effective heatpipes worth of thermal dissipation. A universal mounting bracket supports the widest range of current AMD and Intel sockets, including the latest multicore Phenom and i3/i5/i7 processors. An included fan speed controller allows you to quiet down the fan to just the right balance of noise and performance for the most discerning user.

Comes with a 120mm fan with fluid dynamic bearings for years of reliable performance and no need to purchase a fan, unless you want even more performance by adding a second fan, hardware for second fan installation is already included. Installation is quick and painless with typical install times of under 10 minutes and it does not require the use of any other tools other than a screwdriver to remove and/or secure the motherboard. Each Effizio heatsink comes with a three year warranty from the date of purchase and as always, you can be sure of getting the service should you need it.

Features

- Comes with a 120mm fan with fluid dynamic bearings for years of reliable performance.
- Does not require the use of any special tools other than a screw driver.
- The installation process is easy with a typical install time of under 10 minutes.
- Features Copper Heatpipes, Aluminum Plates and Fins.

Specifications

sku	EFZ-120HA4
rated dba	8-28
dimensions	105x131x153mm
base material	Copper Heatpipes, Aluminum Plates
fin material	Aluminum Fins
weight	836g
rpm	800-2000
cfm	34-102
current draw	<0.36A
power consumption	<4.32w
bearings	FDB, fluid dynamic bearings
cpu compatibility	Socket LGA775, LGA1156, LGA1366, 754, 939, 940, AM2, AM2+, AM3

Additional Information

Brand	SilenX
SKU	EFZ-120HA4-D
Weight	2.5000
Material	Copper/Aluminum
Fan Dimensions	120mm
Fan Connection	4-Pin PWM
Special Price	\$28.95
