Description

Masterkleer, a name that is well-established in the water cooling sector!

Highly flexible, intense colors, a true eye-catcher for your system: This is what Masterkleer brand-name tubing stands for. Made from highly flexible PVC this tubing can be used in all areas of your water cooling system.

It can be used to bridge larger distances to external coolers, in a micro-enclosure with very little space or even in a server for 24/7 operation: This tubing can be used for virtually any application one could imagine. The experience in the “computer water cooling” sector gained by Masterkleer’s manufacturers over the years allows this tubing to be of unique quality. Most even thicknesses for maximum reliability, exceptional bending capabilities, a long lifespan, no discoloration of the coolant and unique color brilliance make this tubing so special!

When a water cooling loop is installed in a computer system it should not only function well, but also look good. This is where the color comes into play. Masterkleer has not only achieved intense colors, the UV-reactivity is also a great effect for your system! The tubing is available in many different colors: From dark to bright green, red, orange, pink, purple, even transparent UV blue, standard blue, yellow, silver, black or white: These are only some of the available colors from Masterkleer!

Individually packaged units?

Masterkleer has taken a whole new approach! The classical 1m unit has been improved, the tubing is available e.g. in 3m length for tubing of the whole watercooling loop and up to 15m in length in one piece with individual packaging for large projects or resellers. The advantages are obvious: The product is more affordable for the customer and the tubing is always shipped in one piece and is easy to store neatly until the next project awaits!

Specifications

Material: PVC

Outer diameter: 19mm (3/8")

Inner diameter: 13mm (5/16")

Maximum operating pressure: 58psi (~4bar)

Operating temperature range: -20°C to +60°C

Compliant with RoHS

Additional Information

Brand	Phobya
SKU	MK-59150
Weight	2.0000
Color	UV Yellow
Tube Type	PVC
Tube Size	1/2" x 3/4" (13mm x 19mm)
Material	PVC
Delivery	Retail Box
Vendor SKU/EAN	4049469102968
