Description

Phoby's latest marvel of cooling Technology!

A fan of both Silent lovers and friends of the performance-optimized system addresses is an absolute novelty in the cooler segment. But this split and still have more talent that fans of other pale with fear, "Fear it!"

The consortium of manufacturers' Phoby "it has achieved through optimum alignment of the blades that increased air flow does not necessarily lead to higher noise levels. The rotor blades are curved in combination with the wedge-shaped alignment of the camp to show the context, the future starts here! The camp, which connects the sash and frame to a minimum point of each other, the drive of coils and an ultra-resistant exterior, which absorbs the shear forces has been achieved so that this fan is almost noiseless, silent fans know what really appreciated. 18 dB / A is a treat if you have the air flow of 169 m³ / h in mind. Exercise extreme Phoby made it enjoyable as their system has zuzufächern coolness!

Of course, this model can even quieter! This fan designed so that even he has to make do with less tension good. For a start voltage range from 7-12V, this fan will be quieter than a gnat, yet the system is still held by a strong air current is very cool!

The look is another point which takes in addition to functionality, a high weighting. Red blades, with elegant black frame, accompanied with red LEDs that illuminate the wings semicircular create an eye-catcher in the system where each user can say to himself: This fan is a good choice!
